

Coins of Hope Highlights

March and April 2025

The Coins of Hope Sewing Program has grown in its ability to produce quality clothing, and to train students who have acquired more skills as seamstresses. The program's talents are visible and admired at the Coins of Hope School and in the community of Mpoyi. The program produced a redesign of the Coins of Hope school uniform for this academic year. The Sewing Program also celebrated International Women's Day for the first time in March 2025. The program took initiative to organize the students to sew special outfits for a public celebration that took place on the Coins of Hope grounds, and featured a guest speaker and parade of the coordinated outfits for men and women. Congratulations to our sewing students as they celebrated the advancement of women and girls in Mpoyi!
